MULTI-DOMAIN SECURITY MANAGEMENT R71

Course Objectives

CHAPTER 1—Multi-Domain Security Management R71 Overview

- Given the needs of your company and your customers, choose the correct Provider-1® implementation to cover these requirements.
- Define the various components of the Provider-1 architecture and apply them to your corporate network.

CHAPTER 2—MDS Installation and Configuration

- Plan a Provider-1 deployment in an enterprise network.
- Install Provider-1 and configure the MDS Manager/Container on a SecurePlatform machine.

CHAPTER 3—Management Concepts & Features

- Create and configure a CMA for a Customer.
- Migrate an existing Security Management configuration into Provider-1 with CMA Migration tools.
- Apply your knowledge of Provider-1 architecture, file system, tools or processes to manage Customer sites.

CHAPTER 4—Logging Features

- Configure and implement a MLM for the Provider-1 environment.
- Configure and implement a CLM for a given Customer.

CHAPTER 5—Global Policies

- Create and implement a Global Policy.
- Configure and implement IPS in the Global Policy.
- Configure and implement VPNs Globally and per Customer.

CHAPTER 6—High Availability and Upgrade Overview

- Create a mirror MDS Manager/Container and enable MDS High Availability.
- Export and import an MDS or CMA into an existing Provider-1 network.
- Upgrade an existing MDS or CMA to R71.
